Operation scheme for DataTrace system

Python Daemon
(for ex. getting temperature)

Python Daemon
(for ex. getting processor load)

Sends data

…

Python TCP Server

Python Daemon
(for ex. getting Instagram photo
number of likes)

Saves
data

SQL Database

Get and
display

C++ Overviewer

Program written especially for getting data gathered in
SQL Database and displaying it for user.
Got many functions simplifying analyzing data.
Biggest part of project.
